

HOUSE

DRIVE

ROAD

Tip!!
Set the filter inside the PIR to "OFF" during Winter months and then Re-set it back to "ON" for the rest of the Year

TIP!!
Aim the PIR between 30-60 degrees across the drive pointing away from incoming traffic

TIP!!
Adjust the detection range to suit your application (depending on detector)

Optimum
Detection
Area

Tip!!
Ideally mount the PIR between 1m—1.5m above the ground & aim the beam parallel with the ground

Tip!!
Ideally mount the PIR between 2m—6m away from the edge of the Drive
